

Unit 7  
Preventing Disease Word  
Wall

A

antibody  
antibiotic  
AIDS  
Asymptomatic Stage  
angina pectoris  
aneurysm  
allergy  
allergen  
arthritis  
Americans with  
Disabilities Act

B

Bacteria  
B cell  
biopsy

C

chlamydia  
chancere  
chronic disease  
cardiovascular disease  
cerebral hemorrhage  
cancer  
carcinogen

D

diabetes  
disability

E

epidemic  
emerging disease

F

fibrillation  
fungi

G

gonorrhea  
genital herpes

H

human papilloma virus  
HIV  
HIV-positive  
histamine  
heart attack

I

Infectious disease  
inflammation  
immunity  
immunization  
insulin  
immune system

L

lymphocyte  
lymphatic system

M

microorganism  
mucus membrane  
malignant  
metastasis  
macular degeneration

O

opportunistic infection  
oncogene  
osteoarthritis

P

pathogen  
protozoan  
phagocyte  
pelvic inflammatory  
disease

R

rheumatoid arthritis

S

sexually transmitted infection  
syphilis  
stroke

T

toxin  
T cell  
trichomoniasis  
tumor  
tinnitus

U

universal precautions  
urethritis

V

virus  
vaccine  
vaginitis  
viral load
